

## Kingsley Cart Spring Installation Instructions

Tools needed:

Phillips screwdriver and Needle Nose pliers

**Step 1:** Remove the four Philips screws that secure each of the four cart top corner gussets as shown below.

**STEP 2:** Remove each of the four gussets in an upward motion disengaging the white float tray guide from the gusset as shown below.

**STEP 3:** Remove the springs from each of the four corner gussets with pliers as shown below.

**STEP 4:** Remove the springs from each of the four corner eye bolts located on each corner of the float tray with pliers as shown below.

**STEP 5:** Once the springs have been removed start with STEP 4 and go in reverse back to step one to install the new springs.

Note: When re-attaching the corner gussets back in place make sure the float tray guide tube are properly mounted onto the guide tube tabs of the top and bottom corner gussets.
